Claims 1-45 have been cancelled.

Claims 46-61 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The present invention pertains to a method for handling errors in a system for receiving packet stream data.

The claimed invention (claim 46 as the broadest claim) recites features such as "...asserting a first register field of the system to enable detecting as an error condition a received packet having a scrambled portion; and negating the first register field of the system to disable detecting as an error condition the received packet having a scrambled portion; and performing an error recovery operation when the received packet has the scrambled portion and the register field is asserted"

The prior arts of record (Nuber et al. U. S. Patent No. 5,742,623 is an example of such prior arts) teach a method and apparatus for communicating data via a packetized data stream, and the detection of and recovery from errors in high rate digital data streams including an indication of scrambling within the packet. The prior arts however do not teach "...asserting a first register field of the system to enable detecting as an error condition a received packet having a scrambled portion; and negating the first register field of the system to disable detecting as an error condition the received packet having a scrambled portion; and performing an error recovery operation when the received packet has the scrambled portion and the register field is asserted". Hence, the

Art Unit: 2133

prior arts of record do not anticipate nor render obvious the claimed inventions.

Therefore claims 46-61 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
